Alexandra Vinogradov

SENIOR QA ENGINEER

053-277-42-69 | abvinogradova@gmail.com | linkedin.com/in/alexandravinogradov

Objective

Senior QA Engineer with 9 years of experience keeping web, mobile, and client-server applications reliable in fast-paced fields like fintech and cybersecurity. My main focus is shift-left testing: collaborating with product and development teams early in the design process to identify quality risks before code is written. I bring a hands-on, proactive testing approach with strong ownership of quality, test coverage, and release validation. Looking to bring this approach to Pearson.

Skills & Abilities

Core Testing Focus: Shift-Left QA, Functional, Regression, Exploratory, API Testing, Integration, Cross-Browser & Cross-Platform Verification, UI/UX, Localization.
Automation & Performance: Playwright, Selenium, Postman, Curl, Swagger, JMeter, GTmetrix, Lighthouse.
Languages & Frameworks: Python, JavaScript, TypeScript, HTML/CSS.
Data & Environments: MySQL, MS SQL, PostgreSQL, Windows, MacOS, Android, iOS.
Management & Tools: Version Management, Sprint Planning, Jira, Qase, X-Ray, Jenkins, Git, Agile (Scrum).

Experience

Senior QA Engineer / Version Management | Resec Technologies *(Cybersecurity company)* **2025 – Present**

- Lead comprehensive QA activities across web and desktop client-server applications throughout the complete software development lifecycle, from initial requirement and design review to final release
- Drive Shift-Left QA and continuous process improvements, ensuring integration requirements and features are fully defined, quality-de-risked, and primed for development during sprint planning
- Design and execute advanced testing strategies, including functional, regression, API, and cross-browser verification
- Use AI to accelerate QA activities, including test creation, test data generation, and scripting
- Collaborate with developers, Product Management and the Customer Success team to identify risks, clarify requirements and resolve issues
- Coordinate version content planning, including feature selection, effort estimation and sprint allocation, considering dependencies between developers
- Monitor version progress and feature readiness, ensuring requirements, design, descriptions and environments are prepared for development and release

Senior QA Engineer | Resec Technologies *(Cybersecurity company)* **2021 – 2024**

- Drove shift-left testing by involving QA in early design phases
- Applied risk-based testing to prioritize high-impact features
- Developed, maintained, and executed manual and automation test cases
- Collaborated with developers, product management and the customer success team
- Reproduced and analyzed customer issues by simulating the customer environment
- Mentored junior QA engineers on test design and defect reporting best practices

QA Engineer | Resec Technologies *(Cybersecurity company)* **2019 – 2021**

- Created test plans and test cases based on functional and business requirements
- Collaborated closely with developers and product management
- Developed and executed load and performance tests

QA Engineer | uTest *(Crowdtesting platform)* **2018 – 2019**

- Functional, UX/UI, Localization testing, Exploratory, Regression, Smoke, Sanity testing
- Desktop and Mobile applications testing

QA Engineer | I-Teco *(Fintech project)* **2017 – 2017**

- Cross-browser and Cross-platform testing
- Test design and test execution

Education

National Research University of Electronic Technology (Moscow, Russia)
Bachelor's Degree in Business Management
